Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner *

Repository name *

 petervn /

Great repository names are short and memorable. Need inspiration? How about [psychic-octo-engine](#)?

Description (optional)

☒  **Public**
Anyone on the internet can see this repository. You choose who can commit.

☐  **Private**
You choose who can see and commit to this repository.

Initialize this repository with:

- `git init`
- `git add -A`
- `git commit -m 'Added my project'`
- `git remote add origin git@github.com:sammy/my-new-project.git`
- `git push -u -f origin master`
